

EU EBSI + TrustVault

EBSI

- Credential interoperability EBSI and SuperApp
- Credentials and data controlled by user, not Big Tech

SuperApp

- Novel use of Verifiable Credentials
- Application independent

1. Request available files with given credentials from specific containers e.g. pictures/
2. Retrieve specific file(s)

TrustVault

- Secure data store
- Granular access control
- Tamper proof access log

-  **Public**
-  **Student**
-  **Friend**
